25X1A

Between 6 and 8:30 p.m. [REDACTED] the radio trucks with antenna systems were still near the former Lufthansa building in the southeastern section of Dresden-Klotzsche airfield. The individual hangar, located farther to the north, was open and apparently empty. Two biplanes were parked in front of the hangar. No flights were made. [REDACTED] occupied by air force soldiers, proceeded across the landing field to the barracks installations. The hangars at the northeastern section of the field were closed. They were illuminated during the night. Nine railroad boxcars were seen on the spur track near the fuel dump on the northwestern edge of the field. Two small fuel containers were observed in the fuel dump which was guarded. \*
